

Technical rider

Bernard Loffet, melodion player
Traditional Fest-noz dance music.

I play in the middle of the dance.

I bring my 3 wireless microphones (Sennheiser ew300)

I need : 3 XLR inputs on the mixer (Voc / Melody / Basses)
and a 230V mains supply (with EEC adapter if different).

The sound system adapted to the capacity of the venue will be set up before the soundcheck. Digital mixers are welcome.

I can make my own soundcheck in 10 to 15 minutes.

I need an equal level between the melody and the basses (the basses must not be lower)
Voice level over the accordion level.

Patch :

1. Vocals.
2. Accordion Melody.
3. Accordion Basses.
